ABBIGERE, CHIKKABANAVARA P.O., BENGALURU - 560090

PROFESSIONAL SUMMARY

Application Development Engineer with hands-on experience in building software, ERP modules, and full-stack web applications. Skilled in Python, React, and UI/UX design using Figma. Experienced in integrating software with embedded hardware systems and delivering end-to-end solutions with a strong focus on usability and documentation.

EDUCATION

- **Bachelor In Engineering (Electronics and Communication)**
College Of Engineering, Chengannur -2020-24.
- **Higher Secondary Education**
Vidyadhiraja Vidyapeetom, Mavelikara-2019-20
- **High School**
Vidyadhiraja Vidyapeetom, Mavelikara-2017-18

TECHNICAL SKILLS

Software/Tools: Spring, Git, GitHub, Eclipse, SQL, VS code, Microsoft Excel, Figma, Windsurf (cascade AI), Claude code.

Web Development: Full- stack development (React Js, Spring Boot)

Programming Languages: Python, Java

Soft Skills- Communication, Time management, Documentation, Planning & Organizing.

Embedded and Hardware: Arduino, ESP32, Circuit and PCB design (KiCAD)

PROFESSIONAL EXPERIENCE

ENGINEER APPLICATION DEVELOPMENT, BANGALORE

EDAC MULTITECH PVT LTD | NOVEMBER 2024-PRESENT

- Designed and developed desktop GUI applications for real-time monitoring and control of high-power voltage regulator systems.
- Developed full-stack web applications using Spring Boot and React, including web interfaces hosted on microcontrollers for antenna signal transmission control and monitoring.
- Designed and implemented ERP modules covering Sales, Purchase, Manufacturing, Inventory, Quality, HR, and Invoicing, supporting end-to-end automated business operations.
- Developed inventory tracking solutions with RFID integration for real-time material traceability and production workflow monitoring.
- Integrated embedded hardware systems with enterprise software to enable seamless real-time data exchange and automation.
- Prepared project budget proposals, cost estimations, resource planning, and technical documentation for customer and internal development projects.
- Participated in client discussions, requirement analysis, solution design, testing, deployment, and end-to-end project delivery.
- Designed user interfaces and application workflows using Figma and developed responsive web interfaces with React, HTML, CSS, and Bootstrap.

PROJECTS

PickWeb – Portfolio & E-commerce Template Website

Designed and developed a single web platform providing ready-to-use portfolio and e-commerce templates using Windsurf (Cascade AI), allowing non-technical users to easily customize and deploy websites.

Water Surface Cleaning Robot

A project under EPICs in IEEE SIGHT, in collaboration with the Kerala Government's Pampa Punarjani Project. The objective is to design a water surface cleaning robot for lakes and ponds.

EMG-Controlled Robotic Arm using Machine Learning

Developed a system that recognizes real-time EMG (Electromyography) signals to control a robotic arm. The system processes collected signals to identify movement characteristics and uses machine learning models to trigger predefined movements or specific actions.

Automatic Indicator Turn-Off System for Two-Wheelers

Designed an automatic indicator turn-off system for two-wheelers based on predefined conditions, improving safety by preventing unnecessary indicator usage after turns.

Verilog Coding IDE

Designed and developed a desktop Verilog Integrated Development Environment (IDE) for digital design and simulation. Implemented features including Verilog code editing, compilation, simulation output visualization, and integrated AI coding assistance using API keys compatible with multiple AI providers. Added a built-in logic analyser for waveform visualization and automatic logic gate diagram generation from Verilog designs, enabling efficient debugging, verification, and digital circuit development.

CERTIFICATIONS

- Java programing - in28minutes (Udemy)
- Java Web service and REST API with spring boot - in28minutes (Udemy)

INTERNSHIPS

- **IoT** - Basics of IoT, course having a duration of one month at ACMEGRADE.
- **Machine learning** - The basics of machine learning, course having duration of one week at REVERTECH at Kochi.

ACHIEVEMENTS

- Student project lead in EPICs IEEE water surface cleaning robot
- NSS Volunteer Secretary [2022-23]
