Abbigere, Chikkabanavara P.O., Bengaluru - 560090

PROFESSIONAL SUMMARY

Application Development Engineer with hands-on experience in building software, ERP modules, and full-stack web applications. Skilled in Python, React, and UI/UX design using Figma. Experienced in integrating software with embedded hardware systems and delivering end-to-end solutions with a strong focus on usability and documentation.

EDUCATION

Bachelor in Engineering (Electronics and Communication)
College of Engineering, Chengannur | 2020-2024

Higher Secondary Education
Vidyadhiraja Vidyapeetom, Mavelikara | 2019-2020

High School
Vidyadhiraja Vidyapeetom, Mavelikara | 2017-2018

TECHNICAL SKILLS

Programming Languages: Python, Java

Web, Desktop & Cross-platform Development: React, Spring, Spring Boot, Electron.js, Flutter; Bun runtime

Software / Tools: Git, GitHub, Eclipse, SQL, VS Code, Microsoft Excel, Figma

Deployment & Hosting: Cloud deployment, Railway, web hosting, local hosting

AI-assisted Development Tools: Codex, Claude Code, Windsurf (Cascade AI)

Embedded & Hardware: Arduino, ESP32, circuit and PCB design (KiCad)

Soft Skills: Communication, time management, documentation, planning and organizing

PROFESSIONAL EXPERIENCE

ENGINEER APPLICATION DEVELOPMENT, BANGALORE
EDAC MULTITECH PVT LTD | NOVEMBER 2024-PRESENT

- Designed and developed desktop GUI applications for real-time monitoring and control of high-power voltage regulator systems.
- Developed full-stack web applications using Spring Boot and React, including web interfaces hosted on microcontrollers for antenna signal transmission control and monitoring.
- Designed and implemented ERP modules covering Sales, Purchase, Manufacturing, Inventory, Quality, HR, and Invoicing, supporting end-to-end automated business operations.
- Developed inventory tracking solutions with RFID integration for real-time material traceability and production workflow monitoring.
- Integrated embedded hardware systems with enterprise software to enable real-time data exchange and automation.
- Prepared project budget proposals, quotations, cost estimates, resource plans, and technical documentation for customer and internal development projects.
- Deployed and hosted web applications locally and in cloud environments.
- Participated in client discussions, requirement analysis, solution design, testing, deployment, and end-to-end project delivery.

PROJECTS

Travels ERP

Developed and deployed a cloud-hosted travel operations ERP integrating quotations, trip records, fleet and driver management, invoicing, and payment tracking in a centralized platform with role-based access. Implemented automatic salary calculation, a reminder system, fully configurable field settings, and vendor management with automatic payable calculations based on vendor categories.

PickWeb - Portfolio & E-commerce Template Website

Designed and developed a web platform providing ready-to-use portfolio and e-commerce templates using Windsurf (Cascade AI), allowing non-technical users to customize and deploy websites.

Water Surface Cleaning Robot

A project under EPICs in IEEE SIGHT, in collaboration with the Kerala Government's Pampa Punarjani Project, to design a water surface cleaning robot for lakes and ponds.

EMG-Controlled Robotic Arm using Machine Learning

Developed a system that recognizes real-time EMG (electromyography) signals to control a robotic arm. Processed collected signals to identify movement characteristics and used machine learning models to trigger predefined movements or specific actions.

Verilog Coding IDE

Designed and developed a desktop Verilog IDE for digital design and simulation, with code editing, compilation, simulation output visualization, and AI coding assistance supporting multiple providers. Added a built-in logic analyser for waveform visualization and automatic logic gate diagram generation from Verilog designs to support debugging and verification.

CERTIFICATIONS

- Java Programming - in28minutes (Udemy)
- Java Web Service and REST API with Spring Boot - in28minutes (Udemy)

INTERNSHIPS

- **IoT:** One-month course covering the basics of IoT at ACMEGRADE.
- **Machine Learning:** One-week course covering the basics of machine learning at REVERTECH, Kochi.

ACHIEVEMENTS

- Student project lead, EPICs IEEE water surface cleaning robot
- NSS Volunteer Secretary (2022-2023)
